Objective :

The objective of this course is to introduce the fundamental ideas to explain the characteristics of scalar and vector valued functions and master these in calculations. provide a physical interpretation of the gradient, divergence, curl and related concepts give an account of important vector field models of Nature.

Course Outcomes:

BMAT-2401.1	After the successful completion of this course student will be able to recognize the level set and graph-of-function to formulate equations of curves and surfaces
BMAT-2401.2	To understand concept of parameterized curve from algebraic, geometric and physical interpretations
BMAT-2401.3	Students will be introduced to the concept of arc length and unit Tangent, vector curvature, torsion.
BMAT-2401.4	To memorize definition of directional derivative and gradient and illustrate geometric meanings with the aid of sketches
BMAT-2401.5	At the end of course, Student will able to acquire knowledge of line, surface and volume integrals

Contents of Syllabus:

Objective:

The purpose of the study of statics is to develop an understanding of the principles of statics and the ability to analyze problems in a systematic and logical manner, including the ability to draw free-body diagrams. Ability to analyze the statistics of calculation of the reactions necessary to ensure static equilibrium and knowledge of internal forces and moments in members.

Course Outcomes:

BMAT-3501.1	To understand the basic concepts of laws of motion and force with its applications.
BMAT-3501.2	To learn about fundamentals of Mechanics, equation of static equilibrium & dynamic equilibrium of particles and rigid bodies
BMAT-3501.3	Students will be introduced to the concept of the effect of friction on equilibrium.
BMAT-3501.4	To learn working skills of kinematics, kinetics of particle and rigid body, related principles
BMAT-3501.5	After successful completion of this course students will be able to know the importance of this subject in the field of Engineering particularly Civil & Mechanical Engineering.

Contents of Syllabus:

Internship in schools is to be organised for a minimum duration of 16 weeks. During this period, the students should be provided opportunities to teach in government and private schools with systematic supervisory support and feedback from faculty. During the Internship, a student - teacher shall work as a regular teacher and participate in all the school activities, including planning, teaching and assessment, interacting with school teachers, community members and children.

School internship should include an initial phase of four weeks of Supervised Teaching Practice in the school. This phase would include school engagement, peer observations and observations of interns' lessons by faculty. During this period, each trainee - teacher has to plan at least 10 lessons in each school subject. At the culmination of this phase, the subject teacher will conduct one discussion lesson for each school subject. First discussion lesson should be held during "Teaching Practice" and 2nd should be at the end of the "Teaching Practice" and this will evaluate the performance of the internal. Each discussion lesson will be of 10 marks.

During Internship, the student - teachers apart from taking regular classes as per the time - table of the school, has to perform certain activities/assignments. Each student - teacher has to plan and deliver at least 40 lessons in each school subject. Besides, the student -teachers are to observe 20 lessons, 10 in each school subject taught by fellow student -teachers.

Further, each student - teacher has to develop strategies/teaching techniques to identify a slow learner/talented learner/child with learning difficulties or any other case/problem for action research at the initial stage of internship programme and conduct the study in detail. A 72 report is to be prepared detailing all the steps of the study. The tools, techniques used, response sheets or any other valuable documents in support of the study should be submitted along with the report. The action research report will be evaluated either by the teacher supervising the internship or by the subject teacher. This action research report will carry 20 marks.

Furthermore, each student teacher is required to prepare and submit teaching learning materials. The quality of the material will be evaluated by the subject teachers and student teachers will be awarded out of 10 marks.

During internship the performance of students will be assessed continuously by internal examiner and at the completion of internship by a panel of internal and external examiners. The final lesson for each school subject will be of 100 marks.

In addition to the above requirements of the university, the student -teachers would have to participate and perform other activities of the school as and when assigned by head of the school. A certificate of satisfactory work by the Principal/ Headmaster of the school shall be issued to the candidate after completion of Internship.
