**SECTION 1**

**Vision & Mission of the University**

**VISION**

To become one of the most preferred learning places a centre of excellence to promote and nurture future leaders who would facilitate in desired change in the society

**MISSION**

- To impart teaching and learning through cutting edge technologies supported by the world class infrastructure
- To empower and transform young minds into capable leaders and responsible citizens of India instilled with high ethical and moral values

**SECTION 2****Vision and Mission of the Department****VISION**

The department aims to inculcate teaching, innovative thinking, and experiential learning voyage by disseminating theory and practice of Dialysis Practical thought to generate exceptional Technicians who make a difference to our community both locally and internationally. It aims at Continuous improvement and development of our primary stakeholder to intellectually evolve as a knowledgeable, research oriented, socially responsible, and productive citizen.

**MISSION**

- To create the environment that facilitates learning fundamentals of dialysis technology.
- To impart the knowledge in Hemodialysis machine, RO Systems and Dialyzer reuse.
- To provide better understanding of the domain of study, including wider social issues, corporate social responsibility and ethical decision making.
- To ensure continuous interaction of the students through MOU's and collaborative clinical exposure.

### SECTION 3

#### About the Program

Bachelor of Technology in dialysis is an Under-Graduate Dialysis technology Program. Dialysis technology is a field of Dialysis that generally deals with the study and application of Kidney failure patients.

Our B.Sc. Program is an Outcome Based Education model which is a 3.5-year, 7 Semester Full time Program of 117 credits with a Choice Based Credit System (CBCS) and Grading Evaluation System. B.Sc. Dialysis technology program is structured semester wise and includes theory and practical to impart the students a holistic understanding of B.Sc. Dialysis technology subjects.

**SECTION 4****Program Educational Objectives (PEOs), Program Outcomes (POs) and Program Specific Outcomes (PSOs)****PROGRAMME EDUCATION OBJECTIVES (PEOs)**

<b>PEO1</b>	Establish their careers in the field of Dialysis technology and related areas, providing innovative and effective solutions.
<b>PEO2</b>	To Analyze, interpret and apply concepts of patient health care skill and dialysis machine handling skill.
<b>PEO3</b>	To train students with good scientific knowledge of entrepreneurial qualities and explore entrepreneurial opportunities by working effectively and professionally in teams and enabling them to evaluate their practical skill.
<b>PEO4</b>	To provide students with an academic environment aware of excellence, leadership, ethical code and guidelines, and the life-long learning needed for a successful professional career.

**PROGRAMME OUTCOMES (POs)**

<p><b>PO 1</b></p>	<p><b>Dialysis Therapy Knowledge:-</b> Students gain a deep knowledge regarding kidney, its related diseases, analytical skills, techniques of Hemodialysis and Peritoneal dialysis ) along with excipients, sitting session for treatment form studies including novel approaches, designing and development of dialysis machine, analysis etc.</p>
<p><b>PO 2</b></p>	<p><b>Research Analysis:</b> Students could apply the knowledge of dialysis in research field to make new discoveries.</p>
<p><b>PO 3</b></p>	<p><b>Design &amp; Development of dialysis machine:</b> Various design forms could be prepared by the dialysis technician in the manufacturing companies for the ease of patients and to avoid complications.</p>
<p><b>PO 4</b></p>	<p><b>Conduct investigations of complex problems:</b> Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.</p>
<p><b>PO 5</b></p>	<p><b>Modern methods usage:</b> Create, select, and apply appropriate techniques, resources, and modern methods with an understanding of the limitations and its usage. The student also learns to handle many instruments related to their studies which would help them work in a Pharmaceutical Industry, pharmacovigilance, regulatory requirements, legal processes etc.</p>
<p><b>PO 6</b></p>	<p><b>Dialysis and society:</b> Dialysis technician provides complete health care data and practices to the people of the society and guides them to be healthy. The student also learns dialysis techniques, patient counseling, ethical laws etc. Student gains expertise in dialysis therapies with all precautions and in-depth knowledge of sessions, adverse effect and other health related issues to deal with indoor and outdoor patients admitted in hospitals and also in public.</p>
<p><b>PO 7</b></p>	<p><b>Environment and sustainability:</b> Understand the impact of the professional Dialysis technician in society and environment, and make an impact of it on the people of the society.</p>
<p><b>PO 8</b></p>	<p><b>Ethics:</b> Apply ethical principles and commit to professional ethics and responsibilities and norms of the Dialysis technician practice. Student is also trained in ethical behavior with physician, nurses and other paramedical staff for protecting patient’s health.</p>
<p><b>PO 9</b></p>	<p><b>Individual and team work:</b> Function effectively as an individual, and as a member or leader in diverse teams acts as a multidisciplinary person in every context.</p>
<p><b>PO 10</b></p>	<p><b>Communication:</b> Communicate effectively on dialysis therapies session with the community and with society.</p>

<b>PO 11</b>	<b>Life-long learning:</b> Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change.
<b>PO 12</b>	<b>Social Interaction:</b> Being a public welfare job a dialysis technician would be able to interact With the people in a better way to cure them and make them feel healthy.

### PROGRAMME SPECIFIC OUTCOMES (PSOs)

<b>PSO 1</b>	Perform the different procedures required by the Dialysis unit like priming dialysis circuit, cannulation, central line insertion and peritoneal dialysis etc.
<b>PSO 2</b>	Able to apply the knowledge of the reuse of dialyzers and new advance technique used in Dialysis.
<b>PSO 3</b>	Able to do multidisciplinary jobs in the kidney care hospitals where patients undergoing hemodialysis.

**Duration of Exam: 3 Hrs**

**OBJECTIVES:** The purpose of the course is to offer the students relevant and actual knowledge of urinary system and its disorders.

S.No.	Content	Hours
<b>Unit-1</b>	Anatomy of urinary system: structural anatomy of kidney, bladder, ureter, urethra, prostate. Histology of kidney. Blood supply of kidney. Development of kidney.	25
<b>Unit-2</b>	Anatomy of peritoneum including concept of abdominal hernias. Anatomy of vascular system: Upper limb vessels: course, distribution, branches, origin & abnormalities. Neck vessels: course, distribution, branches, origin & abnormalities. Femoral vessels: course, distribution, branches, origin & abnormalities.	30

**COURSE OUTCOMES:** On completion of this course, the students will be able to

<b>CO1</b>	<b>BDIS -2403.1</b>	Student gain knowledge in basic anatomy of various regions like limbs, thoracic and abdominal viscera, neuroanatomy, endocrine system, basic radiology which provides foundation in completion of the course.
<b>CO2</b>	<b>BDIS -2403.2</b>	Students will able to understand about the Gastro Intestinal Tract, location, surfaces, lobes, relations, and blood supply of Kidney.
<b>CO3</b>	<b>BDIS -2403.3</b>	Students will able to understand anatomy of Thyroid, Adrenal, Parathyroid, Pituitary glands and Pancreas.
<b>CO4</b>	<b>BDIS-2403. 4</b>	Students will be train with good clinical skill related to dialysis technology which will leads to entrepreneurial qualities and employability.
